Key  
to Success!**

**SIU 42<sup>nd</sup> Annual Performance Tested  
Bull Sale**

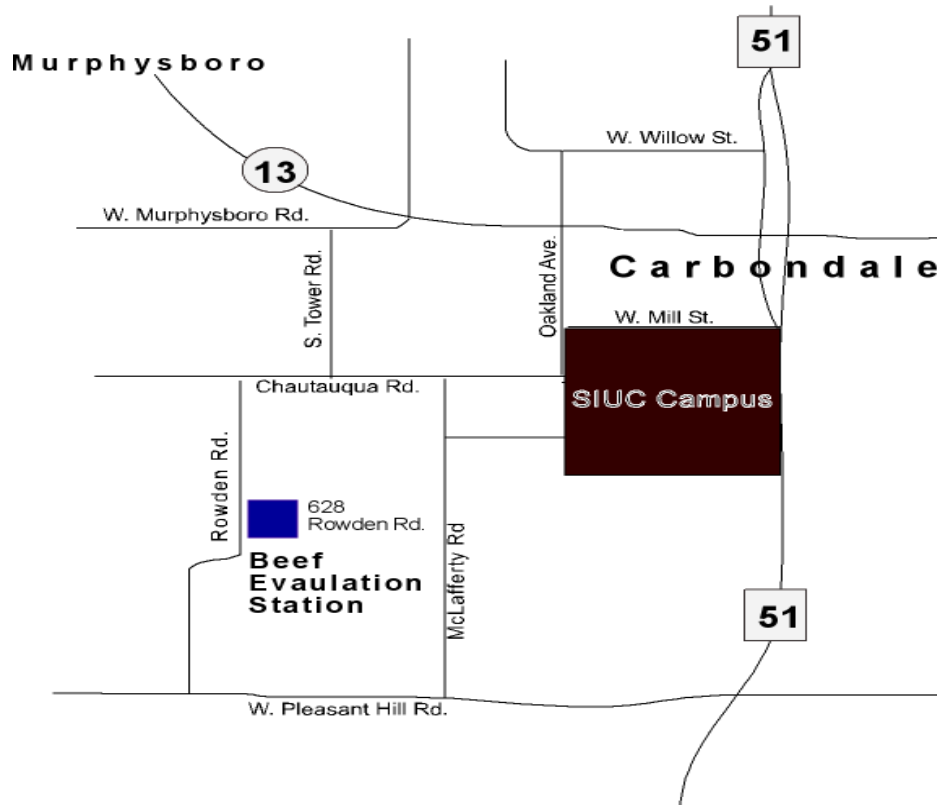

**March 1<sup>st</sup> @ 6:30 pm**

**Lowderman Auction Services  
Cody Lowderman, Auctioneer**

**SIU** SOUTHERN ILLINOIS UNIVERSITY  
**BULL TEST STATION**  
CARBONDALE

It is my distinct pleasure to invite/welcome you to our **42<sup>nd</sup> Annual SIU Performance Tested Bull Sale AND 3<sup>rd</sup> Annual Common Sents Bred Heifer Classic**; to be held on Friday, March 1, 2019 at 6:30 p.m. This year's sale offerings continue the tradition of providing a source of high quality genetics and individual feed efficiency. SIU is one of the few test stations in IL that offers true individual feed efficiency data on all bulls. **The sale order: Senior Angus, Jr. S X A, Junior Angus, Senior Red Angus, Senior S X A, Junior Simmental, and Junior Red Angus. The bulls will be followed by a high quality set of females!!!**

Directions to the sale:

**Registration will begin at 4:00p.m., awards/recognitions at 6:00p.m., and the sale at 6:30p.m. sharp**

I would like to make some acknowledgements and ask you to share in thanking the following if you see them at the bull sale:

- Chloe Buchanan, Cameron Helderman, Rebecca Harris, Melissa Mueller, and Katie Kloss – Bull Test Interns
- Michelle Sullivan and Samantha Wuest for help throughout test
- Samantha Rasmussin for helping with bloodwork data
- All of our Partnerships – see ads at the end of the catalog
- Buchheit Feeds – for delivery and supply of feed
- Jared Collier and Campbell Belcher for clipping of bulls
- Sigma Alpha Sorority and Farmhouse Fraternity – **Hamburgers, hot dogs, chips, dessert, and drink \$5.00**
- Dr. Anderson for his consultation and Meller-James & Associates for being available sale day to write health papers if needed
- The Advisory Board Members for their assistance
- COAS for supporting this event
- All the undergraduate ANS students helping with the sale

**Auctioneer:** Cody Lowderman

**Ring men:** provided by auctioneer

**Sale:** bulls will be run through the ring and there will be NO online bidding.

**Bidding:** there is no minimum bid; disputes as to bids will be settled by the auctioneer and his decision will be final.

**Terms:** Cash only; checks need to be made payable to: Southern Illinois University.

**Handling:** The bull will be at the buyer's risk as soon as sold.

**Breeding Guarantee:** Bulls were BSE tested on February 11, 2019 and those that did not pass will not be for sale.

**Liability:** All persons who attend the sale do so at their own risk. SIU Beef Evaluation Station assumes no liability, legal or otherwise, for accidents which occur.

**Facilities:** Bulls are housed in 27' x 104' pens with 27' x 24' shelters open to the south and fed using the Calan Broadbent Feeding System.

**Diets:** Bulls were fed a receiving, growing, and step-down ration as formulated and delivered by Buchheit Feed.

**Registry & transfer of health:** Registration papers will be transferred to buyer at seller's expense. Interstate health certificates can be furnished on all bulls if needed.

**Test Period:** Bulls went on test October 23, 2018 after a three week adjustment period and went off test on January 15, 2019.

**Genetic Disorders:** All bulls were proven free of non-lethal genetic defects at time of sale. All bulls have been genomic tested for enhanced EPDs.

**Performance/Catalog Information:**

- Adj. 205-d and 365-d WT are in accordance to the bulls breed association.
- Feed/Gain is the pounds of feed needed per pound of gain. This figure is adjusted according to the Beef Improvement Federation for differences in weights of the bulls.
- Ratios are the bull's trait measurement divided by the average trait measurement of all bulls within that breed.
- Scrotal, Pelvic, and Frame measurements were adjusted according to the Beef Improvement Federation.
- Carcass data is actual measurement according to the CUP lab.
- Sale index =25% EPD ratio + 25% ADG ratio + 30% F/G ratio + 10% REA ratio + 10% IMF ratio.

**ABBREVIATIONS:**     **Jr.** – Junior **or Sr.** – Senior **and then Ang** – Angus; **S x A** – Simmental x Angus cross;  
                              **Sim** – Simmental; **Here** – Hereford; **RAng** – Red Angus

**RFI:** Residual Feed Intake is a measurement based on what we would have predicted the bull to have to eat to meet its energy requirements compared to his actual intake. An RFI of 0 means that the bull's intake was as predicted (average). An RFI that is negative (-) means that the bull's intake was less than predicted and the bull is more energy efficient. An RFI that is positive (+) means that the bull's intake was greater than predicted and is not as energy efficient.

**All announcements and/or changes that need to be made after the printing of this catalog will take precedence over printed material in this catalog.**

All inquiries/concerns should be addressed to:

Colten Collier @ 618-697-0404 or colliercattle8@siu.edu

Greg Osman @ 618-499-0608 or gregory.osman@siu.edu

**ATTENTION BUYERS: bulls can be left for up to 4 days after the sale but then a \$15/day fee will be applied. All arrangements will need to be made with Colten Collier or Greg Osman**

The test station can assist you with coordinating bull delivery, if needed, please just let us know the night of the sale!

**General EPDs:**

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**\$W and \$B**, is an index value expressed in dollars per head for weaned calf value and beef value.

**API and TI**, is an index that evaluates sires for use on the entire cow herd if you are keep replacements; while **TI** is an index that evaluates sires for use in a terminal sire breeding program.

**HB and GM**, is an index that evaluates the sire for use on Red Angus cows if you are retaining the heifers; while **GM** is an index used for feeders in the feed yard and on the rail.

**Want a bull for your heifers?** See table below for minimum CE to qualify as a heifer bull, then look for a **HB** in the catalog which will denote that the bull has been identified as acceptable for breeding heifers.

Service sire breed	Maximum birth weight EPD	Minimum calving ease direct EPD
Angus		+7
Charolais		+9.8
Red Angus		+9
Simmental		+13.6
Simm/Angus		+13.6

**APPENDIX:** Towards the back of the catalog; immediately before the ads.

Lot number with corresponding page numbers is available for easier look up of bulls and heifers

**Attention: All Scan Data Will Be Available on Sale Night, Sorry for inconveniences**

**Senior Angus**
